

# MIDD summit

Successful New Drug Applications are often the ones where Model Informed Drug Development (MIDD) is applied from early on. As the demand for accelerated timelines are growing, and regulatory scrutiny increasing, sharing experiences and perspectives is beneficial and of great importance, to evolve internally and to impact and influence externally.

## Invitation

It is our pleasure to invite you to a summit, where Dr. Martin Bergstrand will share highlights from his ISoP webinar *MIDD to Support New Drug Applications* followed by a round table with MIDD industry leaders from the Nordics.

After lunch, you are more than welcome to attend the SUP meeting (Stockholm-Uppsala Pharmacometrics), including a series of presentations from academia and industry on the theme *Semi-mechanistic Models Based on PK and/or PD Data*, followed by a networking mingle, where you can meet with the community - a mix of local and international pharmacometrics experts.

Both these events are free of charge.

For more information and to sign up for the SUP meeting visit:

[www.sup-meeting.se](http://www.sup-meeting.se)
